

Histogram Processing

Histogram Processing

- Histogram
- where k is the k th gray level and n_k is the number of pixels in the image having gray level k
- Normalized histogram

Histogram Equalization

- Histogram equalization is used to enhance contrast.
- It is not necessary that contrast will always be increase in this.
- There may be some cases were histogram equalization can be worse.
- In that cases the contrast is decreased.

- Histogram equalization

FIGURE 3.16 A gray-level transformation function that is both single valued and monotonically increasing.

- Histogram Equalization Problem
- https://www.tutorialspoint.com/dip/histogram_equalization.htm

- Local enhancement
 - Histogram using a local neighborhood, for example 7×7 neighborhood
